

General Supplier Requirements

Purpose: To outline the requirements needed to supply Mesa Industries with quality parts that meet all product specifications.

1. "Parts shall conform to drawing specifications, and any deviation needs to be approved in writing by the Buyer and Engineering".
2. A First Article Inspection (FAI) is required to initially qualify a part/process for a new supplier.
3. Material Test Reports (MTRs) shall be supplied for all stainless-steel parts and product materials with chemical, physical, and metallurgical requirements.
4. A Certificate of Conformance (C of C) shall be supplied with all orders to verify a quality inspection was done before shipment. A C of C is a document certified by the Vendor that the supplied good or service meets the required specifications.
5. All parts to be free of burs, and sharp edges.
6. All threaded holes to be clear of all foreign debris.
7. Parts shall be packaged to Industry best practices for shipments.
